

Gym & Fitness Rules

1. Weight Gain

- Eat more calories than you burn.
- Prioritize protein-rich foods: eggs, chicken, fish, paneer, milk, curd, dal, soy, etc.
- Eat carbohydrates: rice, roti, oats, potatoes, fruits.
- Add healthy fats: nuts, seeds, peanut butter, etc.
- Do strength training 3–5 days/week.
- Increase weights/ reps gradually.
- Sleep 7–9 hours.
- Avoid trying to gain weight mainly through junk food.

2. Weight Loss

- Eat fewer calories than you burn.
- Keep protein high.
- Eat vegetables, fruits, whole grains and protein-rich foods.
- Limit sugary drinks, excessive sweets, fried food and alcohol.
- Do strength training + regular walking/cardio.
- Don't crash diet.
- Aim for gradual, sustainable weight loss.

3. Muscle Gain

- Strength train consistently.
- Get enough protein throughout the day.
- Eat enough total calories.
- Use progressive overload.
- Train each major muscle group regularly.
- Recover properly.
- Sleep 7–9 hours.

4. Fat Loss + Muscle Preservation

- Maintain a moderate calorie deficit.
- Keep protein intake adequate.
- Continue resistance training.
- Don't eliminate carbohydrates completely.
- Get enough sleep and recovery.

5. Before Workout

- Drink water.
- Eat a suitable meal/snack if needed.
- Warm up for 5–10 minutes.
- Start with lighter sets before heavy lifting.

6. During Workout

- Maintain proper form.
- Control the movement.
- Don't sacrifice form just to lift heavier.
- Rest appropriately between sets.
- Stay hydrated.
- Stop if you experience severe pain, dizziness, chest pain or difficulty breathing.

7. After Workout

- Eat a balanced meal containing protein and carbohydrates.
- Rehydrate.
- Cool down if helpful.
- Give muscles enough recovery time.

8. General Food Rules

- Protein: include a good source in most meals.
- Carbs: choose mostly minimally processed sources.

- Fats: include healthy fat sources.
- Fiber: eat vegetables, fruits, legumes and whole grains.
- Water: drink regularly according to thirst, activity and climate.
- Minimize highly processed foods rather than assuming they must be completely banned.

9. Recovery Rules

- Sleep 7–9 hours.
- Take rest/recovery days.
- Don't train through serious pain.
- Increase training volume gradually.
- Recovery is part of progress.

10. Gym Safety Rules

- Learn exercise technique before increasing weight.
- Use a spotter/appropriate safety equipment for risky heavy lifts.
- Keep gym equipment organized.
- Don't ego-lift.
- Follow the gym's equipment and hygiene rules.
- If you have a medical condition, injury, or unusual symptoms, get appropriate professional advice before changing your training.

11. Important Assistant Rule

If a user asks about **weight gain, weight loss, muscle gain, fat loss, diet, exercise, or gym**, the assistant should first understand the person's:

- Age
- Sex
- Height
- Current weight
- Goal weight
- Goal: weight gain / weight loss / muscle gain / fitness

- Activity level
- Workout experience
- Food preferences
- Dietary restrictions
- Workout availability
- Sleep routine
